

Lunge Feeding Flip-Book Activity

For this activity, you will need a pair of scissors to cut out the next three pages.

1. Cut out the next three pages along the vertical dotted lines at the left of each page. Then cut out each of the 18 panels. At the base of each panel cut along the dotted line.
2. Place the panels in order, following the numbers from 1-18.
3. The top of the panels should be flat against each other. The base of the panels should fan out, with the first panel being the smallest and the last panel being the largest.
4. Staple them all together on the dotted line in the center of the first panel.
5. Hold the book with one hand at the top, where the staple is. To see the whale lunge and eat its fill of plankton and squeeze out the tons of extra water it takes in, flip the pages with your other hand, like this:
